## Full employment for UdL holders in Medicine and Biomedicine

## The doctors are the ones that charge a higher salary, with an average of 2,479 euros gross per month

All graduates from the University of Lleida (UdL) in Medicine and Biomedical Sciences are employed. This is reflected in a study by AQU Catalunya on the labor insertion of university holders, driven by the same universities through social councils. The study determines that the insertion in these degrees is 100% in all cases above the Catalan average, which stands at 96% and 86.3% respectively.
