

Survey Subject-Teaching

The survey campaign for the 2nd semester and the annual survey will be launched from May 6

The evaluation campaign by students of the 2nd semester subjects of the 2023-24 academic year of the bachelor's and master's degrees of the Faculty of Medicine is open until May 26 (degrees) and June 16 (masters).) The participation of students in this campaign is essential as it gives them the opportunity to provide first-hand information about the opinion they have of each of the subjects and this provides very valuable information to the teachers and the center to improve quality. The survey can be answered through any electronic device and is available in Catalan, Spanish and English. The response time for each survey is less than a minute. We encourage you to take the surveys for all the subjects you have enrolled in! Access the surveys through the attached QR code. Thank you very much for your collaboration.
